

Wooden pallet 1200 x 800 mm

Features

The CPR 4-way wooden pallet is equipment that can be used in circuit distribution and freight transport, produced according to strict technical specifications, characterized by its green colour and customized branding.

Advantages

Its structure and dimensions conform to international regulations, therefore suitable for use in production facilities and automated warehouses.

Its characterization with logotypes and custom colours acts as a deterrent to improper use.

Its sturdiness and technical characteristics increase load stability so reducing damage to the product and risks to health and safety of workers.

Specifications

Dimensions - in millimetres:

Length 1200

Width 800

Height 145

Pallet entry window - in millimetres:

L 1200; Width 383 Height 100

L 800; Width 228 Height 100

Average empty weight: 25 kg

Nominal load (capacity):

in shelving longitudinal (side placement 1200) is equal to 1000 kg; in movement with fork lifts is equal to 1000 kg; in stacking it is equal to an additional 2000 kg. Nominal loads apply to a uniform load distribution (uniformly distributed load).
